POSTMAN / OOP / MVC / UI & UX DESIGN / DEVOPS / SQL / MONGODB / POSTGRES /  
JIRA / REACT.JS / JSON / NODE / GRAPHQL / INTELLIJ / VSCODE / HEROKU

## Experience

02.2022 - 03.2023

### AMOUNT, NY - *Senior Solutions Engineer*

- Configured Amount's robust SaaS loan, account and servicing platform.
- Deployed, upgraded and monitored Microservices via Jenkins & Kubernetes.
- Utilized Kibana/Elasticsearch logging to detect problems.
- Coded in Java Spring Boot Microservices and had to fix issues along the way.
- Used IntelliJ IDE & VSCode to spin up services and React.js front-end locally facilitating development. Hit breakpoints in Java to debug issues.
- Issued SQL queries in a Postgres Database using DataGrip IDE & inspect GraphQL to confirm and debug. Tweaked API's schemas.
- Implemented JSON configs driving backend decisioning workflows AMQ events to trigger contract signing and email sending processes. Multi-tenant.
- Reversed engineered React Front-End via VSCode & debugged via Developer Toolbar & React Dev Tools browser extension. Postman Requests validating API's.
- All code versioned in GitHub and I committed code and merged and rebased via git commands and raised pull requests on a daily basis. Conducted code reviews.

01.2016 - 02.2021

### CONVIVA, NY - *Senior Integration Engineer*

- Assisted in 500+ integrations of analytics SDKs for QoE metrics. Video player pro.
- SME for customer's developers/engineers/VPs building trusted relationships.
- Assisted vendors: Globant, Accedo, WalterThompson, Possible, +.
- Helped with Google IMA & Freewheel ads hook into analytics.
- Helped design proprietary reporting tool which QE used to generate validation.
- Tech POC for field team: Solutions Consultants & Sales Directors.
- Detected bugs in SDKs & Pulse platform (Experience/QoE, Ad, Content & Player Insights), Opened ~ 300 JIRA tickets (bugs and improvements) & Agile Lifecycle.
- Leveraged proprietary tool Touchstone & Charles to debug, setup proxy & inspect network traffic (Charles Proxy).
- Assisted Support Engineers with troubleshooting.
- COPA / CCPA / GDPR compliant & Traveled for customer onsite visits (in 2019, I traveled 20x).
- CMAF/HLS/DASH manifest & renditions/bitrates & provided tips on error codes, handling and reporting.

12.2012 - 10.2015

**The Walt Disney Company - ESPN, CT - *Senior Software Engineer***

- Developer on WATCH (video) product - domestic & international.
- Built OTT Watch (Cricket World Cup leveraging CSG Entitlement System's API).
- Engineered Stream Limiting for SlingTV inclusion.
- Added new Java Applications to custom ESPN Admin & Built RESTful endpoints
- Engineer Video Platform (Java Spring) / Integrated FreeWheel / GoPub CMS
- Built lightweight browser based tools for video catalog & administration

04.2008 - 11.2012

**The Walt Disney Company - Disney Interactive, CA - *Senior Software Engineer***

- Tech Lead on 5 (full stack) LAMP projects securing back channel calls (MakeYourMark Style-Studio; Phineas & Ferb Music Video Player; Disney Channel Halloween, MonstOber stunts; WordPress Collections).
- Tech Lead on 3 Java (CMS / TomCat / TEA templates) projects(Disney DVD Portal; Disney Digital Books; Disney Junior w/ActiveMQ).
- Hooked into Continuous Integration (TeamCity) system & Collaborated on Engineering Video Players / Integrated Email System (Beacon).
- Engineered Send To A Friend & Shout Out for DisneyChannel.
- Developed XML based Audio Player & Added Polls into Disney Quiz.Java.
- Developed a voting module that generated 1.7 million submissions.

## Education

Pace University, Pleasantville - *Bachelor of Science*  
Computer Science & Mathematics

Columbia University School of Engineering, NY - *Certificate of Completion*  
Bootcamp FullStack Development / MERN
